

设置评标办法时，含有“投标报价”评分点的，需要设置打分方式。打分方式设置为“自动打分”的需要选择基准值公式及扣分公式，并填写相关参数，请仔细查看各公示的备注信息，选择适当扣分公式。否则系统将无法自动算分。打分方式设置为“直接打分”的则评标过程中系统将不进行自动算分，需评委手动算分后，输入得分。

The screenshot displays a software interface for configuring evaluation criteria. A modal window titled "修改评分点" (Modify Evaluation Point) is open, showing settings for a point named "投标报价" (Bid Price). The "打分方式" (Scoring Method) is set to "自动打分" (Automatic Scoring). The "基准值公式" (Benchmark Formula) is "qhsjzff", and the "扣分公式" (Deduction Formula) is "if([A1],[A2])". The total score for this point is 30.00. A warning message states: "投标报价与基准价相比的差率, 每高1%扣 分, 每低1%扣 分; 请务必在编辑框处准确填写相关扣分数值, 否则会导致计算异常, 无法正常评标!" (The difference rate compared to the benchmark price, for every 1% high, deduct points, for every 1% low, deduct points; please accurately enter the relevant deduction values in the edit box, otherwise it will cause calculation anomalies and normal evaluation will be impossible!). The background interface shows a sidebar with "评标办法设置" (Evaluation Method Settings) selected and a table with one row for "投标报价" (Bid Price) with a score of 30.00.
